

# JONATHAN YOUNGBLOOD

## SOFTWARE ENGINEER

Generalist software engineer and open source library author with deep experience in web application development. Expertise in building custom portals, dashboards, APIs, and internal tools.

### WORK HISTORY

---

#### Director of Software Development

Ocean Companies (2022–present)

Overseeing development and maintenance of custom internal software systems that help manage day-to-day operations. Responsible for delivering functionality from business requirements, in addition to technical support and bug fixes.

#### Full Stack Developer / Consultant

Independent Client Services (1998–present)

Freelance web site design and development, mobile application development (iOS, Android, PWA), custom software solutions, IT consulting, content production. Clients range from clothing companies and rock bands to sports associations and defense contractors.

#### Principal Software Engineer

Click Enterprises (2011–2022)

Developing and maintaining internal project management software, custom digital signage, admin dashboards, and various web sites.

#### UI Developer

Company 52 (2011)

Developing user interfaces for WordPress web sites, browser plugins, and custom mobile applications.

#### Interactive Developer

OPUBCO / The Oklahoman (2009–2011)

Web design, front-end development, UX/QA testing, custom internal tools, and various web-related projects for Oklahoma City's largest newspaper.

#### Full Stack Web Developer

purlImage Media Services (2006–2009)

Web site design, development, and server maintenance. Occasionally handling aspects of project management, client relations, and general graphic design.

### LANGUAGES & TOOLS

---

I prefer *mostly* LAMP-based solutions, which help me deliver value quickly and reliably:

PHP	Astro
JavaScript	Node.js
HTML & CSS	Bash / Linux
MySQL	Laravel

Over the years I've had extensive experience with various other technologies, including:

WordPress	MongoDB
Typescript	PostgreSQL
React / Next.js	ASP / .NET
Vue, Svelte	Go

I'm always learning something new, adopting new technologies as I find they fit my needs.

### OTHER SKILLS

---

Graphic design  
Photography  
Audio editing  
Video production
